PSE 3310/3325-14

		torque	torque (energized)	rated speed
	PSE 3310-14	10 Nm	5 Nm	25 min ⁻¹
	PSE 3325-14	25 Nm	12.5 Nm	10 min ⁻¹
	Duty cycle		30% (basis time 300s)	
	Mode of operation		S3	
	Supply voltage		$24\text{VDC}\pm10\%$ galvanically separated between control and motor and bus	
	Rated current		3.2 A	
	Power consumption (control unit)		0.1 A	
	Positioning accuracy absolute measurement of position taken directly at the output shaft		0.9°	
	Positioning range		250 rotations ²⁾ not subject to mechanical limits	
	Shock resistance in accordance with IEC/DIN EN 60068- 2-27		50 g 11 ms	
	Vibration resistance in accordance with IEC/DIN EN 60068-2-6		1055 Hz 1.5 mn 551 000 Hz 10 g 102 000 Hz 5 g	
	Output shaft		14 mm hollow shaft with clamp ring and feather key	
	Brake		optional (holding to	rque=nominal torque)
	Max. axial force		20 N	
	Max. radial force		40 N	
	Ambient tempera	ture	045°C	
	Storage temperature		-1070°C	
	Protection class		IP54 (IP65 on red	quest)

Aluminum, Zinc

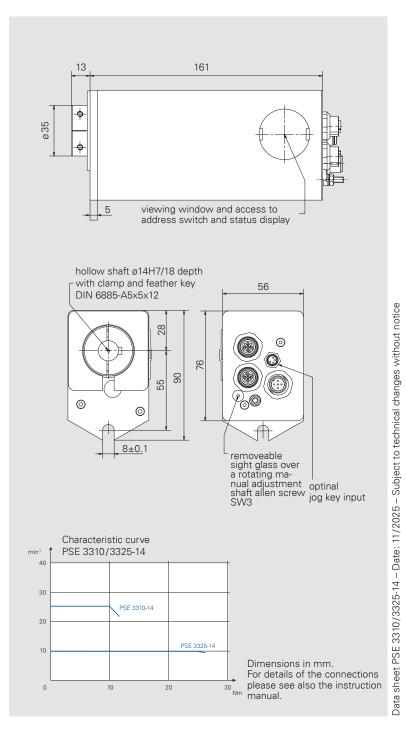

CE/UKCA, optional: NRTL,

optional: STO with/without test

1350 g

pulses 1)

²⁾ With PSx 3xx with IO-Link, the travel range can be increased by a multiple of the absolute measuring range of 256 revolutions and a partial absolute travel range of over 500,000 revolutions can be realized.

¹⁾ STO: only for EtherCAT, EtherNet/IP, POWERLINK, PROFINET, without galvanic separation of the supply voltage

How to choose your suitable positioning system?

To order our standard products, you can use the graphics on the right for an initial performance assessment of the products and the corresponding order code of the 3 series. The ordering process is described below using an example.

Choose the appropriate **design** based on your operating conditions

Type:

- Vertical or horizontal form (value even or odd)
- max. rated torque (x) for orientation see characteristic diagrams
- Output shaft (8 or 14) and solid or hollow shaft

select required protocol / interface (bus communication)

integrate the **connections** that are essential for you

if necessary, select a **brake** (without brake select 0)

select required certificates

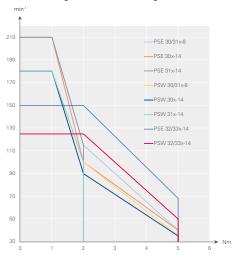

G

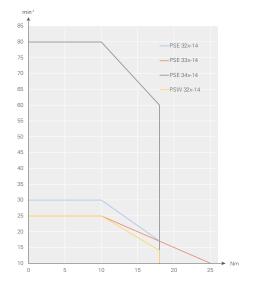

select IP protection class

For example, a stainless steel housing (PSW), the 30x design, a maximum rated torque of 2 Nm and an 8 hollow shaft would be required (302-8). Besides IO-Link, the standard connections are required, no brake, the CE/UKCA certificate and IP65.

Order code **PSW 302-8-IO-0-0-65**

Torques and speeds

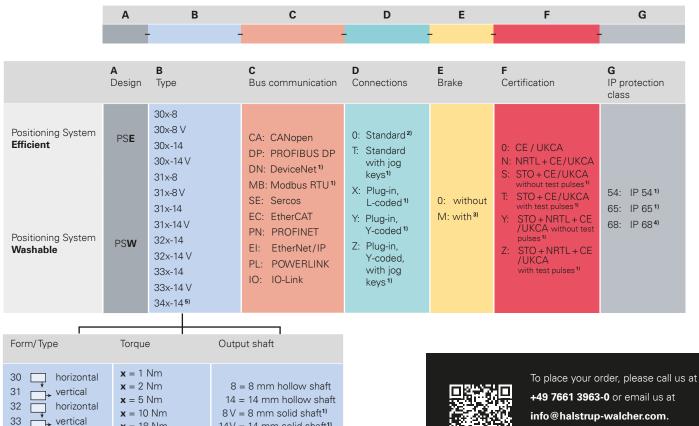

Order code PSE/PSW 3 series

 $14V = 14 \text{ mm solid shaft}^{1}$

horizontal

x = 18 Nm

 $x = 25 \text{ Nm}^{5}$

34

For additional contacts, please visit

www.halstrup-walcher.de/en/contact

Please refer to the data sheets for the respective standard combinations.

Please contact our sales department.

2) The standard is 3 plugs / sockets (except for IO-Link or Y-coded connector)

³⁾ only for variants with 14 mm output shafts

⁵⁾ only for PSE

Accessories for our positioning systems

The connectors shown here can be used for all device types (PSE / PSW). With PSE (IP 54 / IP65), this guarantees the IP protection classes. If required, we are happy to help you find a suitable connector for a PSW (IP 68) - please contact us.

Jog key box (for Option T in section D of the Order code)

Order no. 9601.0241

Software

Use our function blocks, description files or commissioning tools for the various industrial protocols. You can download the files under www.halstrup-walcher.de/en/software. To do this, enter your specific product in the drop-down menu that appears and select the Software tab in the tab view. After that, the software components are available to you.

You want to see our products in person?

We are represented at numerous trade fairs and will be happy to advise you. Visit us on site and let us find the ideal solution together. You can find our current exhibition dates and product news at:
